

Digital Data Loggers

Software Troubleshooting

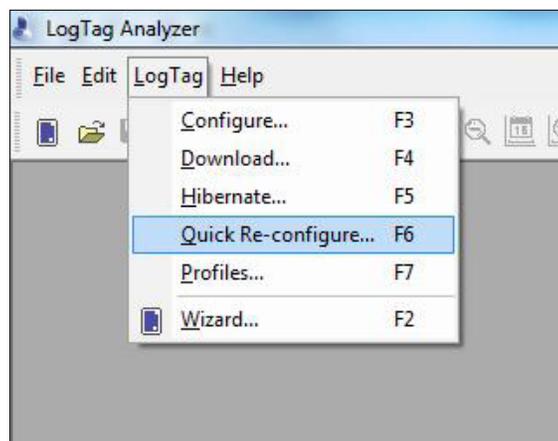

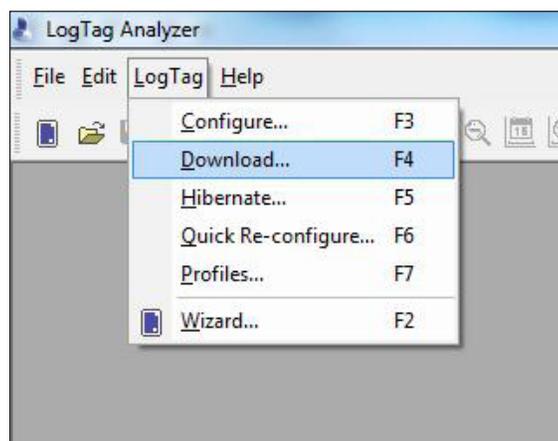

Downloading Data from Logger to Computer

Troubleshooting Steps:

1. Open LogTag Analyzer software
2. Plug in LogTag Interface cradle
3. Place device in cradle
4. Download will begin automatically
5. Device will configure automatically

If software does not automatically download, follow these steps:

1. Select LogTag
2. Select download
3. You will receive a pop-up and the data will begin to download
4. Then select Quick Re-configure to configure device
