

WHY YOUR DOCTOR
SAYS YOU SHOULD
GET ALL

3

HPV* VACCINE SHOTS

*Human Papillomavirus

HPV is a very common virus that can lead to:

Where you get
the vaccine

Cancers of the mouth and throat

Cancer of other sex organs

Genital warts

Cancer of the cervix (women only)

Where you get
the vaccine

The HPV vaccine
can prevent these!

Do I really need HPV vaccine? **Yes!**

Your doctor says you should get the HPV vaccine because it may prevent some types of cancer and genital warts.

Do I need it if I don't have sex yet? **Yes!**

- You can get HPV just by skin-to-skin contact.
- You don't have to have sex to catch HPV, but sex increases your risk.
- People can get and spread HPV without knowing it.

Why do I need 3 shots?

- You need 3 shots to be fully protected.
- Get all 3 before you catch the virus.

Why get the vaccine at age 11-12 years?

- The vaccine works even better in pre-teens than in teens.
- Older teens and young adults should get 3 HPV vaccines, too.

Is HPV vaccine safe? **Yes!**

- Millions of doses of HPV have been given.
- You may get a sore arm.
- A few people faint, so sit for 15 minutes after getting the vaccine.

When should I get the HPV vaccine?

Have your doctor's office staff fill in this chart

Vaccine	Recommended	When	Place (e.g. clinic)
#1	Best at ages 11-12 but it can be given to those 9-26 years old		
#2	1-2 months after vaccine #1		
#3	At least 6 months after #1		

For more info on vaccines for teens, see
