

HPV Vaccine

Philadelphia HPV Data

HPV Immunization Rates in Philadelphia

Teens (13-17) Completed 3-dose Series by Zip Code

Today, more teens in Philadelphia are starting and finishing the 3-dose HPV vaccine series than ever before. The maps above show that more teens (male and female, 13-17 years) in 2014 were up-to-date on the HPV vaccine than in 2011.

However, there is still a lot of progress to be made. The best zip codes have just over 40% teens up-to-date, which is still below the Healthy People 2020 goal of 80% up-to-date.

HPV Vaccine

Philadelphia HPV Data

According to the National Immunization Survey (NIS) published on July 30, 2015, the city of Philadelphia has the **best in the nation** HPV-immunization rates for females: 80.3% for ≥ 1 -dose and 59.3% for 3-dose series completion.

Philadelphia also had the **largest increase** among males completing the 3-dose HPV vaccine: from 15.5% in 2013 to 34.8% in 2014.

HPV Immunization Rates in Philadelphia

Teens (13-17) ≥ 1 -dose by Year and Gender
