

Philadelphia Immunization Program Immunization Update

September 11, 2015

VFAAR Flu Vaccine for 2015-16

2015-16 VFAAR Flu Vaccine is Now Available to Order

1. Fax in temperature logs from the last time your site ordered
2. Log onto KIDS Plus IIS at <http://kids.phila.gov/>
3. Complete an initial reconciliation for flu (subsequent flu orders will only require a reconciliation completed within 60 days of your flu order)
4. Check the “Will this be an influenza order?” box on the vaccine order page
5. Order only what your site needs for a 4 to 6 week period
6. Order only what you can store in your refrigerator
7. Check the status of your order 2 business days later in KIDS Plus IIS to see if your order has been processed
8. Check the “VFAAR Program Comments” section of your order screen to receive any notes regarding your order entry

PDPH will make every effort to fulfill your complete flu vaccine request; however, in the event that flu product is available in limited quantity, PDPH will reduce your order and notify you via the KIDS Plus IIS comment box.

Continue ordering flu vaccine throughout the season as needed. Keep vaccinating until product expires. Only use VFAAR vaccine to vaccinate VFAAR eligible patients (uninsured and 19-64 years).

Flu vaccine may typically arrive separately from other vaccines even if flu and non-flu vaccines are ordered at the same time. The day you receive your flu order, log into the KIDS Plus IIS and electronically receive the doses via the Pending VTrckS Shipment link from your On-Hand page. If you receive a vaccine shipment with an out-of-range temperature monitoring reading, please contact the Immunization Program immediately.

The latest VISs can be found on <http://www.cdc.gov/vaccines/hcp/vis/index.html>

Product	Manufacturer	Eligibility	Type	CPT Code	CVX Code
Fluzone®	Sanofi Pasteur	19 - 64 years	Inactivated, trivalent	90658	141
